Crown Drinkers

Features:

- Easy to fill
- Translucent body to see food level
- Durable metal handle for carrying
- Easy to clean

Product Information:

Crown drinkers have a proven track record to stand up to the harsh Australian and New Zealand backyard conditions.

Ball Type: The smaller Crown Green & White drinkers simply press–fit onto the base. The larger models twist–lock for positive attachment. Ball–type drinkers prevent chicks standing in the trough.

Straight Drinkers: The advantage of the straight–sided drinker is that the birds can drink without having to duck under the bulge of the water container. The bowl is also wider, allowing more drinking space.

Crown Drinkers with legs: Allow for a more hygienic drinking environment by elevating the bowl off the ground away from dirt.
