

Farmhand Prodders

Features:

- Sealed battery and motor compartments
- Fully discharges, no residual shock or charge
- Flexible, shatter resistant shaft
- Powerful - 6,900v at peak

Product Information:

These very reliable prodders pass all of our user requirements, and are available at excellent prices. Output is 6900v. Available as regular battery-powered (yellow) or as 240v-rechargeable (red). Both units can cope with short-term immersion in water. Both feature On/Off master switches which prevent accidental use, and eliminate any residual shock. The finish is excellent with smooth round-cornered

mouldings, with no cavities to collect dirt. A quick wipe down with a wet cloth and they look like new again. Handle units are lightweight. Shafts are polycarbonate and feature an O-ring seal to ensure contacts stay dry. These prodders are very suitable for use by hard-working truckies and drivers. We guarantee them.
