

Hoofers

Features:

- Colour-coded for left and right claws
- Low profile for minimal irritation
- Heavy duty and hard wearing
- Easy to fit

Product Information:

Hoofers are Shoof's newest hoofcare addition. Proudly made in New Zealand, these hard-wearing clogs are made of durable PVC and designed to aid in the recovery of lameness issues by alleviating pressure/pain on the effected claw. The Hoofier has been designed with a high wall to make it much less likely to be dislodged during walk of severely lame animal. These blocks are designed to stay on the claw for 4 weeks and may have to be removed. This is all dependant on conditions and cow mobility.
