

Crown Suspended Feeders

Features:

- Suspended – increased hygiene
- Grill to prevent food waste
- Translucent body to see food level
- Easy to clean

Product Information:

The Crown Green & White suspension feeders have some valuable features. The suspension point incorporates a wing nut adjuster for feed flow. This gives a very wide range to produce optimum flow and trough levels for various feeds and seed sizes. Also the troughs have

segregations to reduce losses from birds flicking feed out sideways. Heavy galvanizing on all metal parts. (15kg feeder is all white).
