

Quiet Wean Calf Weaner

Features:

- More time eating, less time bawling
- Reduced pacing than traditional weaning
- Low-stress weaning in 4-7 days

Product Information:

A new product from Canada, the Quiet Wean is a more humane weaner. The manufacturer claims that bawling, and aimless walking of newly-fitted calves, is reduced and time spent eating is increased by 25%. The weaner does not incorporate the usual weaner spikes, allowing the calf to graze, drink, and socialise more normally. Quiet Weans can be removed, washed, and reused. Pack of 25 only. Instructions included.
