

FIL Detail Paints

Features:

- Water-based
- Environmentally friendly
- Highly visible colours
- Easy to clean

Product Information:

Detail is the environmentally-friendly water-based fluorescent tail paint from FIL. The same reliable formula as the 1L Applicator but now bulk packaged in 4L and 10L pails to reduce both plastic and product wastage on farm. The water-based product makes cleaning of brushes and equipment much easier, and the fluoro colours are highly visible. Lasts 21 days (subject

to conditions and correct application). Detail dries fast (about 5min), but being non-solvent based it is less irritant to severely rubbed cows. Use with a Tail-Mate roller for quick and easy application.
