

Daisy Lifter

Features:

- Cow is supported over large body area
- Adjustable rear straps
- Standard model and x-large model
- Complete kit supplied in carry bag

Product Information:

The Daisy Lifter cow lifter is designed for medium term support for a down cow. The cow is supported over a large body area, thus reducing pressure points. Fully adjustable to any size

animal, and manufactured from lifelong materials. The Daisy Lifter is supplied as a complete kit in a handy carry-bag. The Daisy Lifter is made in standard and x-large models.

The Standard model will suit all medium size dairy breeds (up to medium-size holstein). The x-large model is 20cm longer and wider, and should be used for large-size dairy breeds and larger beef cows. Recommended maximum lift load for the Daisy-Lifter is 1,000kg.
