

Bucas Therapy Range

Features:

- Technologically advanced rug to help horses suffering from ailments such as back problems
- Reflects magnetic fields in the body and stimulates blood flow and oxygen
- Aids healing and reduces swelling and inflammation
- Available as a turnout rug, stable rug and dog rug

Product Information:

The Recuptex material of the Bucas Therapy range stimulates blood circulation and promotes oxygen supply which in turn, promotes recovery and helps dispose waste created in the muscles. Made from a very fine stainless-steel mesh weave, the material reflects the natural magnetic fields created in the body to promote healing. The Therapy rugs assist in more effective warm-ins, enhanced relaxation in the body and faster recovery after heavy work.

Turnout Rugs:

The silky Dermo-care lining of the Therapy Turnout rug wicks away moisture and keeps the horse dry. This rug is available in varying weights to accommodate seasonal change: 50g and 150g.

The Turnout Light rug is ideal for use during the warmer months of spring/summer/autumn. It comes with a lightweight mesh lower to help circulate the air around the horse's body during hot/humid days. The lower mesh helps the horse to regulate its temperature during travel and hot days. The rug has attachment points at the neck and rear D-rings so can be used and secured under another Bucas rug during recuperation in the stable or while turned out in the field.

Limited sizes available.
