Product Information:

The Bucas Therapy Dog Jacket helps to prevent numerous problems and also helps in the treatment of a vast array of ailments. The Recuptex material is made from an extremely fine, stainless steel mesh so it reflects the magnetic fields created inside the body. This stimulates blood circulation and oxygen flow in the dog's body, which heals and reduces both swelling and inflammation and promotes faster healing.

This stimulates blood circulation and oxygen flow in the dog's body, which heals and reduces both swelling and inflammation and promotes faster healing. It is NOT a magnetic jacket and can be left on your dog 24/7 if required. It is ideal for all dogs, especially working and older dogs. It is waterproof and breathable with a rip-stop outer fabric, adjustable full-belly protection, reflective strips on rear and elastic leg straps. The Recuptex properties cannot be washed out, meaning your Therapy dog jacket can be washed.
