

# How to Attach Your Bucas Leg Straps?

Order code: 224241

Bucas has recently introduced a new pair of Elastic Loop Leg Straps that are adjustable and available separately for use on all Bucas rugs. These leg straps are made from a combination of nylon and elastic, with an elastic loop on one end and a metal swivel snap hook on the other.

Here is the step-by-step process for attaching leg straps to your horse's rug:

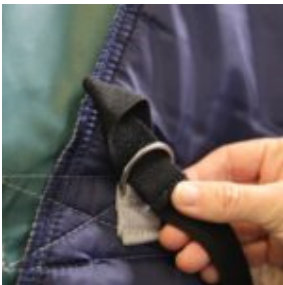

1. Take the left leg strap and attach it to the left-hand D-ring by the stitch marks of the cross surcingles.
2. Place the leg strap through the horse's legs and attach it to the left D-ring where the fillet string is tied.
3. Take the right leg strap and attach it to the D-ring on the right-hand side at the stitch marks for the cross surcingles.
4. Bring the strap through the legs while looping through the left leg strap and then attach it to the right-hand D-ring for the fillet string.
5. Make sure there is enough room for your hand to fit between the strap and your horse's inner thigh. This way of fastening the leg straps will help stabilize the rug while allowing the horse to move freely.

6. Attach the left leg strap to the left-hand D-ring by the stitch marks of the cross surcingles

7. Attach the left leg strap to the left-hand D-ring by the stitch marks of the cross surcingles

8. Attach the left leg strap to the left-hand D-ring by the stitch marks of the cross surcingles

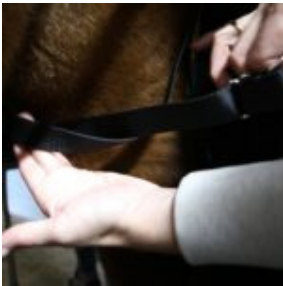

9. Attach the left leg strap to the left-hand D-ring by the stitch marks of the cross surcingles

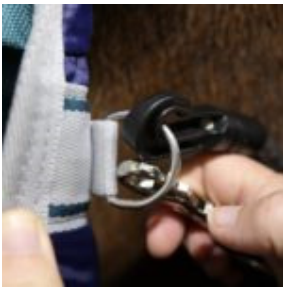

10. Attach the left leg strap to the left-hand D-ring by the stitch marks of the cross surcingles

11. Attach the left leg strap to the left-hand D-ring by the stitch marks of the cross surcingles

12. Bring the strap through the legs while looping through the left leg strap

13. Attach Snap to Rear D-Ring.
