

Bovi-Bond™ Certification

In 2023, it became mandatory in the European Union for users of 2-component Urethane adhesives to have a certificate. This certificate shows that you know what you are working with and how to handle such materials. At Shoof we are proactively aligning with these high European Standards.

This means that users of our Bovi-Bond should follow a short online course to obtain this certificate.

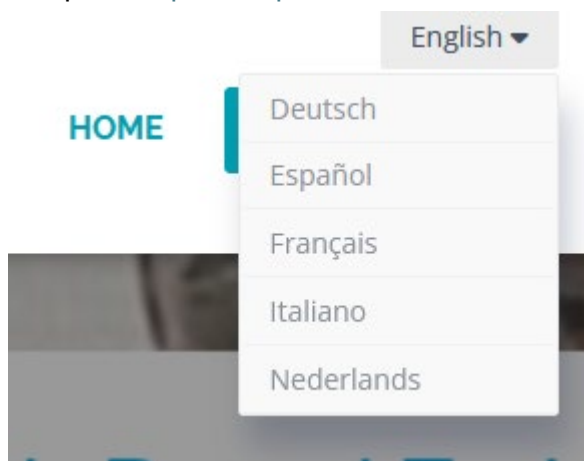

Shoof is offering this normally paid course for FREE with the coupon code **FEICA_21_G**

The course was created by ISOPA, an association of producers in the European Union. As a result, the course is not specifically about the application of Bovi-Bond, but about the general application of all products that fall into the category of urethane adhesives.

The course is available in several languages, so using the drop down select English.

Below is a step-by-step plan for registering for the course:

1. Jump to: <https://isopa-aisbl.idloom.events/048>

2. Then click on register and fill in the form. You create an "**Idloom passport**" with this. This allows you to follow the course and always come back for other information and additional courses. (if there is interest)
3. **On the next page, use the coupon code **FEICA_21_G****
This will apply the 100% discount to the cost.

For any questions, please contact us at www.shoofint.com/contact

4. Create a password and you can log in.

5. Follow the training, and pay a lot of attention to it, you will only receive a certificate after successfully taking the test afterwards.
6. You can print the certificate and keep it in a physical form or retain it digitally.
