

# Excal Teat Little Softy

## Features:

- Soft rubber 'starter' teat for new-born lambs/kids
- Compatible with standard Calf feeders (22mm hole)
- Inverted tip provides fast-flow with no leaks
- Older stock should graduate to black 'Grower' teat

## Product Information:

Our 'Little Softy' lamb/kid teat has been designed especially for use in our gravity lamb feeders. The Little Softy features

the same inverted-tip design as our famous 'Big Softy' calf teat, that is, fast-flow for hungry animals, and a non-leak quality. The Little Softy teat will fit straight into any feeders using standard New Zealand-manufactured pull-through calf teats. This enables any of these type calf feeders to be easily converted to lamb or kid feeding. Or if you wish to create your own feeder, drill 22mm holes in any suitable container.

NB: The 'Little Softy' is a very soft 'starter' teat. It may not stand up to heavy use by older lambs and kids. Teats should be changed to the 'Grower' lamb/kid teat at that stage.
