

# Nest-O-Matic

## Features:

- Ventilated nest box
- Galvanised construction
- UV-resistant
- Easy to clean

## Product Information:

The Nest-O-Matic is a well-made ventilated nest box. All galvanised steel and UV-resistant plastic. The box is a generous 30cm square, with a height of 49cm overall. Swinging plastic curtains give cosy feel inside that poultry prefer for laying. The inside floor features an easily removed soft plastic mat. The front deck extends 16cm out, and lifts up for retrieval of eggs, which

roll to the front under the deck, as the hen moves off them. The nest mat 'pile' keeps the eggs clear of any floor manure, as well as being soft and comfortable for the hen to sit on.

**NB:** This unit needs minor assembly on receipt. Instructions included.
